Public Knowledge, Public Use or Prior Inventions

The video game used at Stanford University in 1963 or 1964 and known to James T. Williams.

The video game entitled "Space War" used and known at Massachusetts Institute of Technology as early as about 1961 or 1962 and at Stanford University as early as about 1963.

The video game of handball or jai alai used and known at the Rand Corporation in about 1963.

The video game of pool and billiards shown at the ACM meeting in Detroit in 1954 and known To William George Brown.

The video games of pool and billiards used, known, and displayed in 1966 and 1968 by Information Display, Inc., New York and known to Patrick Mularky.

The video game known as "bouncing ball" played at the Rand Corporation in about 1955 and played at Massachusetts Institute of Technology in about 1961 and known to Stephen Russell.

The video game of tennis shown to high school students and others at Brookhaven National Laboratories in 1958 and 1959 and known to David W. Potter and William A. Higinbotham of Brookhaven National Laboratories, Upton, New York.

A video game of baseball used and known at Control Data Corporation in about 1967 and known to Thomas J. Spence.

General Electric Interim Space Flight Simulator (including a color television raster scan display) of the type delivered to NASA, Houston, Texas in or about 1964 and as modified in or about 1967, which produced a display of (1) a lunar-scape with a sun shadow of a lunar module maneuvering over a textured surface; (2) landing and take off from an aircraft carrier; (3) a helicopter-tank battle with tracer bullets; and (4) docking of a lunar module with a command service module all of which are known, in varying extent, to William Miller, Fred T. Pearce and James Smith of NASA, Houston, Texas; Rodney S. Rougelot and Edward Wilde of Evans and Southerland, Salt Lake City, Utah; Nick Ide of General Electric Co., Binghamton, New York; and Werner Sharp and William Purdy of General Electric Co., Syracuse, New York.

Offer for Sale

The offer for sale to TelePrompter in January or February 1968 of a device incorporating the subject matter of Patent No. 3,549,284, the parent of reissue Patent No. Re. 28,507.

In addition to the above prior art Atari, Inc. and Sears Roebuck and Co. intend to rely upon United States Patent No. 3,728,480, in suit, as anticipation or as showing the state of the art relative to the remainder of the patents in suit; and upon United States Patent No. 3,549,284 and Reissue Patent No. Re. 28,507, both in suit, as anticipation or as showing the state of the art relative to United States Patent No. 3,549,284 and Reissue Patent No. Re. 28,598.
